

## PROJECT FOR THE WORKS OF THE RIGHT CHANNEL OF THE LLOBREGAT RIVER IN ST: BOI

This works belongs to an urban improvement project in the centre of Sant Boi de Llobregat. A landscape improvement of the Right Canal was carried out within the project. The sphere of activity is around 420 l.m. of canal. To be exact the area along the Dr. Antroni Pujadas street (phase 1) and the Carles Martí and Vila street (Phase 2). The vegetation growing within the canals is poor in natural value. There are installed Fiber roll™ vegetated, Roc roll™ and it is made an interlace with Fiber roll™ where we plant bushes and Plant plug™.
